You can use the same **patent pending** insight preparation system for different purposes; the limit is your imagination

# One-Stop Innovation Hub to Support you for Cost Reduction

Problem 1: Cost reduction activities are dispersed and it is difficult to keep track, ideas and knowledge are all in different systems and these systems are usually not intuitive to use

Solution: You can use the INNODARE Platform with the following utilities for [CO-innovative cost reduction](#)

- Prepare your own categories for cost reduction areas
- Send the link inside the company or also to your stakeholders for proposals
- Universal, easy and intuitive entry including possibility of addition of photos
- Assign the cost reduction responsables as editors
- Review the ideas and prepare excell sheets or pdf documents
- Use the system as written brain storming area
- Use the system as knowledge data base

# One-Stop Innovation Hub to Solve Your Problems

Problem 2: **Problem solving methodology** not used effectively by all the company; the input of all the stakeholders could not be provided; same problems are tackled repeatedly due to lack of knowledge database

Solution: You can use the INNODARE Platform with the following utilities for [innovative problem solving](#)

- Prepare your own categories and methodology for problem solving
- Send the link inside the company or also to your stakeholders for input
- Universal, easy and intuitive entry including possibility of addition of photos
- Assign the problem solving responsables as editors
- Review the ideas and prepare excell sheets or pdf documents
- Use the system as written brain storming area
- Use the system as knowledge database

# One-Stop Innovation Hub for Innovation Idea Management

Problem 3: **Innovation ideas management system** usually requires special software either prepared in in-house or bought or on subscription bases, difficult to use, not flexible, usually requires training

Solution: You can use the INNODARE Platform with the following utilities for [innovation idea management](#)

- Prepare your own categories and methodology for idea management
- Send the link inside the company or also to your stakeholders for input
- Universal, easy and intuitive entry including possibility of addition of photos
- Assign the idea management responsables as editors
- Review the ideas and prepare excell sheets or pdf documents
- Use the system as written brain storming area
- Use the system as knowledge database

# You can use the same patent pending insight preparation system to solve your problems; the limit is your imagination

## Some Examples

- Knowledge and experience management
- FMEA Preparation
- Requirements determination and planning
- Innovative customer requirements insight development
- ISO 26262 support
- HARA preparation
- ..... (please add your problem)

# One-Stop Innovation Hub to Support you for Skills Management with T-Office

Problem X : **HR competency planning and team formation**: Usually the positions, related competencies, required expert skills are in different data bases and difficult to update and difficult to retrieve when needed; difficult to form the right team for projects and problem solving

Solution: You can use the INNODARE Platform with the following utilities for [position competencies and team forming](#) (T-Office)

- Prepare the competencies required for each position in your organization
- Prepare the skills needed for experts
- Keeping all the competencies and skills in the same database which is easy to achieve
- For recruitment, the related position or expert profile can be made active for external applications
- Easy and effective search of the expert database for potential candidates
